Feedback from participants

We believe that this exhibition has been very successful for our company in terms of finding partners and exploring new interesting solutions. I would like to specifically highlight the professional program that took place during this exhibition, featuring a number of highly skilled individuals. We wish Interlight Central Asia further growth and hope that the exhibition will expand in the coming years, attracting more visitors and participants! See you soon! We look forward to coming back!

Grigory Naydenkov, Wolta Company

We participated in this exhibition for the first time, and we really liked it. We have collected about 50 business contacts that are very valuable to us and will be our potential customers and partners. We plan to participate in the next exhibition, and we hope to process all our contact databases and find new clients and partners.

Alexey Kuznetsov, Theben AG Company

As this is our first exhibition, we are really pleased with everything. We were quite worried, but overall, thanks to the organizers of the exhibition, everything went great. We are very satisfied. We have found new partners and clients. I think we will become participants of this exhibition again, not only in Kazakhstan but also in Moscow.

Yegor Lazarev, Woland Steel Company

Exhibition has been a great success for our company, allowing us to maintain and continue business relationships with our local partners and to grow and build new contacts and relations with potential customers, designers, contractors, installation companies, and authorities at both local and international levels. We are very proud to say the exhibition was a fantastic and big success. Thank you for organizations. And we will be glad to come back here in 1 year.

Paulina Anna Sikorksa, FAEL LUCE SPA Company
